

# Legend FL type fiber laser cutting machine

Référence interne :

CARACTERISTIQUES:

- Autofocus system (optional) for automatic laser beam centering, ensuring excellent cutting quality on all types of metal sheets and reducing operator setup times.
- Monobloc chassis for stable acceleration and precise cutting.
- Compatible with all material types (Steel, Stainless Steel, Aluminum, Copper, Brass).
- Automatic nesting with material detection via internal camera for optimized sheet usage without indexing.
- Programmable nozzle cleaning cycle based on selected material.
- High-quality components.
- CE-compliant anti-radiation glass panels.
- Accessible from both front and rear.
- Removable slag collection tray.
- Efficient remote suction and filtration system adhering to current standards.
- Dual-table system for simultaneous loading and unloading, maximizing productivity.
- Sturdy structure and ergonomic design for operator comfort.
- Reduced operational costs.
