Dener DDS ball screw electric press brake

Référence interne :

CARACTERISTIQUES:

- 100% electric.
- Up to 40% energy savings.
- 30% faster than a hydraulic press brake.
- High bending speeds and reduced noise.
- Low maintenance costs.
- Environmentally friendly and ergonomic.
- Ball-screw ram drive for
very high precision.
- Automatic bend sequence calculation
for STEP and DXF files.
- PROMECAM/AMADA-type tool clamping as standard
- ESA touchscreen CNC control with 21" screen
- Quick and easy to learn
