

DDS type ballscrew electric press brake

Référence interne :

CARACTERISTIQUES:

- 100% electric.
- Up to 40% energy savings.
- 30% faster than a hydraulic press brake.
- High bending speeds with reduced noise levels.
- Low maintenance costs.
- Environmentally friendly and ergonomic.
- Ram movement via ball screws ensures very high precision.
- Automatic calculation of bending sequences for STEP and DXF files.
- Standard PROMECAM/AMADA tool mounting.
- ESA touchscreen CNC control with a 21" screen.
- Quick and easy to use.
