Dener Smart XL hydraulic press brake

Référence interne :

CARACTERISTIQUES:

- Precise, high-quality bending.
- Reinforced, stress-relieved structure.
- Deeper throat (400 mm to 600 mm depending on tonnage),
- Long stroke (300 mm to 455 mm) depending on tonnage and bending length
- Greater daylight (530 mm to 680 mm) depending on tonnage and bending length
- Uprated hydraulic system with internal gear pump: faster and quieter.
- Ram guided at all times on 4 contact points.
- PROMECAM/AMADA-type tool holders as standard.
- ESA S 640 CNC control with 15" 2D touchscreen and 3D visualisation as standard.
- Very high-quality hydraulic components.
- Easy servicing and maintenance
