

# GFL type fiber laser cutting machine

Référence interne :

CARACTERISTIQUES:

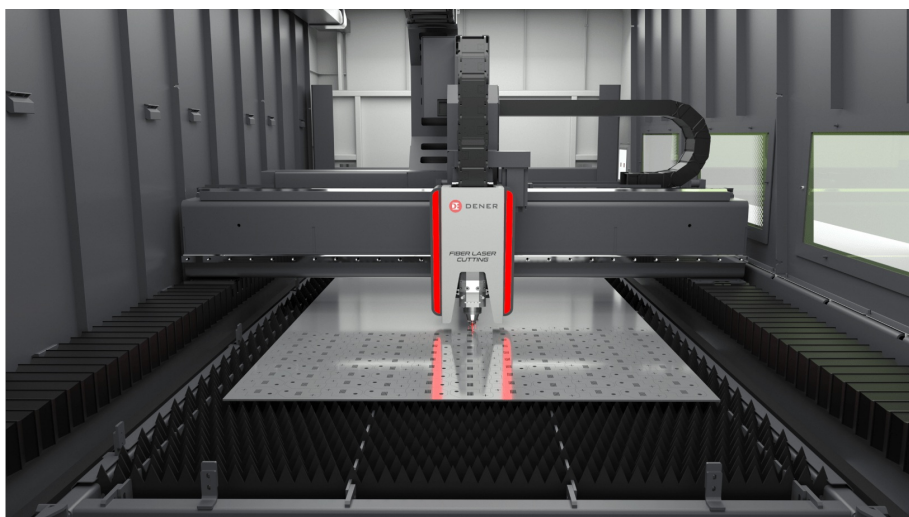

- Automatic parameter adjustment based on specified thickness and material, ensuring optimal cuts.
- Dual-table system for simultaneous work and unloading, maximizing efficiency.
- Removable slag tray beneath the frame for easy access.
- Quick lens replacement system for the cutting head (5 minutes), reducing maintenance downtime.
- Cutting head equipped with collision protection and replaceable safety screws.
- Real-time temperature monitoring of the cutting head and laser source.
- Integrated cooling system for the cutting head and source.
- FLYcut rapid cutting system.
- Reliable and fast movement via rack and pinion mechanism.
- CE-compliant anti-radiation glass panels.
- User-friendly 21" touchscreen CNC control system (FScut type).
- Sliding front door for easy machine access.
- Dynamic structure and ergonomic design.
