

# Fiber Laser Cutting Machine

Référence interne :

CARACTERISTIQUES:

- With autofocus system, thin and thick metal sheets can be cut with the best quality.
- One-piece welded body, capable of achieving a very high acceleration.
- Low operating cost and low energy consumption.
- Excellent cutting results on all types of material.
- High quality components recognized worldwide.
- Automatic sheet metal loading and unloading system.
- Modern and compact design.
- Dynamic structure and easy to use.
